

# 3D Animated Instructions and Parts Breakdown

## Introduction

Thanks for evaluating our trial versions of animated kit installation instructions and our 3D parts breakdown. We look forward to receiving your feedback on these. You can send feedback email to [john.stark@a-dec.com](mailto:john.stark@a-dec.com). If you prefer, send your phone number and suggested days and time and we will telephone you.

**Download the Viewer.** To use these animations and the parts breakdown on your iPad, iPhone, tablet computer or smart phone, you will first need to download the free IPM Viewer application from Autodesk. Choose the appropriate link below for your device.

[Android](#)

[iPhone](#)

**Learn about the Viewer.** The application will do more than just play an animation. You can also interact with the underlying 3D product model to zoom in, spin it around, or double tap for part number. Use the marker on the timeline to fast forward or reverse the animation. For information on using the IPM Viewer, tap on the i in the upper right corner of your device display.

**No touchscreen device?** If you don't have a tablet computer or smart phone, we've also provided videos of the animated instructions on [YouTube](#) that you can play on a standard computer.
